

information about the properties of pharmaceuticals, wherein said user computer is connected to a communication medium by which said user computer communicates with one or more other computers run by or on behalf of (a) a Health Maintenance Organization, (b) an insurance company, (c) a drug benefit plan, (d) an offsite pharmacy, (e) a laboratory, and (f) a physician practice.

85. (Amended) A computer implemented method of creating a prescription, comprising the steps of:

- a. capturing prescription information using a computer interface of a personal digital assistant;
- b. formatting said prescription information for communications; and
- c. sending said prescription formation to an offsite pharmacy over a communication link to be filled.

94. (Amended) A computerized prescription system, comprising:

at least one user computer, said user computer having a graphical user interface permitting capture of prescription information and providing access to [one or more] all of (1) information about a patient's medical history, (2) information about therapeutic agents and (3) information about individual prescriber activity, wherein the information is obtained from [one or more] only offsite databases.

95. (Amended) The system of claim [24] 94 in which said information [an] about individual prescriber activity is stored on said user computer and also on another computer.

96. (Amended) The system of claim [24] 94 in which said information about a patient's medical history includes identification of one or more prescriptions and an identification of a person who prescribed said one or more prescriptions.

97. (Amended) The system of claim [26] 96 in which said identification of a person who prescribed said one or more prescriptions includes identification of how to contact said person who prescribed said one or more prescriptions.

98. (Amended) The system of claim [24] 94 in which said graphical user interface includes providing suggestions to a provider for dosages based on said patient's medical history.

99. (Amended) A computer program product, comprising:

- a. a memory medium; and
- b. a computer program stored on said memory medium, said computer program containing instructions for capturing prescription information and providing access to [one or more] all of (1) information about a patient's prescription history, (2) information about pharmaceuticals arranged by medical conditions for which the pharmaceuticals are suitable for treating, and (3) information about the properties of pharmaceuticals, wherein said computer program comprises further instructions to communicate with one or more other computers run by or on behalf of (a) a Health Maintenance Organization, (b) an insurance company, (c) a drug benefit plan, (d) an offsite pharmacy, (e) a laboratory, and (f) a physician practice.
